ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is now available on magnetic tape in a variety of formats and options from Leasco Systems & Research Corporation. Under special authorization from the National Institute of Education (DHEW), these tape files are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of education research. Report literature (announced in *Research In Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for *RIE*, and quarterly and annual updates for *CIJE*, so that the files may be kept current

The basic files are available in either the ERIC Format (IBM 360 OS) or in the Library of Congress MARC II Format. These files include the complete resume (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high quality, 9-track tapes (600-, 1200-, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as $50.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, which have heretofore been available only internally to components of the ERIC network. The Title Index provides access by document title. Postings publications provide access by: subject index terms, i.e., Descriptors (controlled indexing vocabulary), and Identifiers (uncontrolled subject indexing); and institutional sources, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Project Number; Contract Number; Grant Number; and Clearinghouse Accession Number. Also offered is the ERIC Operating Manual, the rules, procedures and guidelines which keep the many components of the ERIC network synchronous with each other.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as $10 for some individual documents.

* Many of these documents are also valuable tools for computer searchers.

ERIC is a nationwide information network consisting of a central staff at the Office of Education and 16 clearinghouses, each of which focuses on a specific field of education. The clearinghouses acquire, review, abstract, and index the documents announced in *Research in Education* and disseminated through the ERIC Document Reproduction Service. The clearinghouses also prepare bibliographies and interpretive summaries of research. Like other documents, these products are announced in *Research in Education* and disseminated through the ERIC Document Reproduction Service. The clearinghouses cannot provide detailed replies to inquiries for information on specific topics. Instead, educators are urged to acquire *Research in Education* and the other ERIC bulletins listed on the ERIC products page and use these resources to search for desired information.
